

FIST-GCO2

FIST generic closure organizer

FIST is a Fiber Infrastructure System Technology.

The generic closure FIST-GCO2 is the environmentally sealed enclosure for the fiber management system that provides the functions of splice and passive component integration in the external network.

The FIST-GCO2 has the following functions and features

- Single-ended design
- Base and dome are sealed with a clamp and O-ring system
- 6 or 16 round entry/exit ports for drop cables and 1 oval port for looped cable
- The UMS (universal mounting system) profiles provide the foundation for mounting combinations of SOSA2 (splice only sub-assembly) and/or SASA2 (splitter array sub-assembly) modules, which consist of a modular grooveplate and trays
- Compatible with most common cable types: e.g. loose tube, central core, ribbon fiber
- Uncut fibers can be stored as single circuits in trays and/or as cable elements in the storage space between the profiles. Storage baskets are available for mass storage of fibers of central core cable constructions.
